We attended the Ankara City Çankaya District National Education Directorate Organization eTwinning Projects Dissemination Event as two eTwinning teachers from our school Gülten Olgun and Simru Pamuk. It was an immensely large scale on site event as all the eTwinners from schools in Çankaya District displayed their projects. We displayed two projects in the event; Ancient Routes and Cooking Dictionary. In the Cooking Dictionary Project, pupils learned different nations' food culture and diets in Europe. They translated food in different languages using digital tools. The students experienced a challenge working with international peers in this project.
