

# WOMEN OF SCIENCE PROJECT 2020-2021

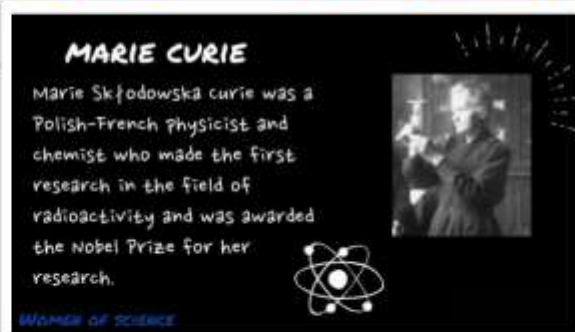

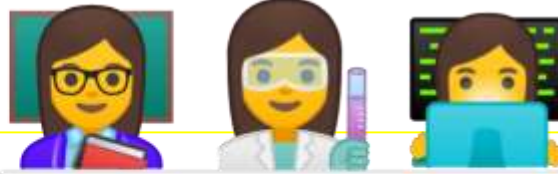

<https://live.etwinning.net/projects/project/225181>

- The effort to obtain information for the subjects that human beings are curious about from the past to the present has created science. It is among the goals of our project to ensure that the place and value of women, who have worked for science, which is the common denominator of humanity, throughout history, is understood. At the same time, we plan to make sure that 21st century youth learn about the work done by women who have worked in science from the past to the present. In the project, we think that young people will enable them to develop in the digital environment by using web 2.0 tools while doing their research. Our students will also provide foreign language development by using the e-matching platform.

# WOMEN OF SCIENCE eTWINNING PROJECT

BETÜL CAN ANATOLIAN  
HIGH SCHOOL 2021

Our eTwinning teacher Dilek ALTUNBAŞ is implementing the Women of Science project with our eager pupils. In collaboration with Turkish and European schools, our pupils are working together to learn the lives of Women Scientists in history. Their contributions to Science will be learnt and will be an inspiration for them as well.

## DISSEMINATION OF OUR PROJECT
